

Bio Multi Kleen

A potent, fragranced liquid concentrate which effectively cleans any surface, biodegrades various systems, and removes all odours.

Product Description:

Bio Multi Kleen is an intensely concentrated blend of multiple Bacillus spores which rapidly degrade odour causing bacteria in multiple applications, while effortlessly cleaning virtually any hard surface. It effectively treats septic tanks, pit toilets, drain lines, sewer systems and grease traps.

Features of Product:

- ✓ Minimum spore count of 1×10^8 CFU/ml on 10X concentrate
- ✓ No EDTA
- ✓ A selected blend of highly active bacteria cultures.
- ✓ Contains a balanced buffer system that secures optimum enzyme activity.
- ✓ Cultures are a mixture of anaerobic and aerobic microorganisms.
- ✓ High enzyme activity including protease, amylase and lipase.
- ✓ Non-volatile and non-corrosive.
- ✓ Easy to be handled and to use.
- ✓ Excellent stability and shelf life.

Optimum Conditions for use:

Bacteria and enzymes in the Bio Multi Kleen Concentrate perform within a pH range of 5.5 to 8.5 with the optimum near pH 7.0. Temperature affects the activity of the working solution and action increases with the rising temperature up to 49°C. No activity can be expected below 4°C.

Recommended Applications:

- General Office Cleaner
- Bathroom Cleaner
- Odour Eliminator
- Septic Tank Cleaner
- Pit Waste Treatment
- Grease Traps & Drain Lines
- Garbage Bins & Disposal Areas

Storage and Handling:

Store in a cool, dry place. Avoid excessive inhalation. Wash hands thoroughly after handling.

Green Cleaning Technology:

Billions of years ago Mother Nature had already solved the problem of how to keep the Earth clean, naturally. Recent breakthroughs in science and technology have helped us to understand how this is made possible. By using the correct good or beneficial bacteria virtually any dirt build up, stain, odour, septic system, FOG's (fats, oils, greases) or even hydrocarbon based oil stains can be safely cleaned, bio-degraded and removed quicker and more cost

effectively than traditional harmful chemicals.

Greendot bacterial cultures are uniquely cultivated from South African soils giving them a massive home ground performance advantage. They metabolize much faster, reproduce quicker and survive longer. Critically our products are EDTA free and are far more environmentally friendly.

Our bacteria are extremely intelligent. They determine what type of organic problem they are being applied to, and then selectively produce the right combination of enzymes to effectively biodegrade their intended target. The process is similar to how your stomach automatically knows how to break down different food types, only our products are exponentially more powerful. The incredible thing is that once the target has effectively been neutralized, the only by-products of this process are water and carbon dioxide!

Long after traditional harsh chemicals have stopped working, our bacteria and enzymes are tirelessly soldiering away on a microscopic level for many hours, days or even weeks later, depending on application. The more the product is applied, the more robust and efficient the colony becomes.

Bio Multi Kleen

Urinal Odour is generally caused by uric acid crystals that build up in the urinal pipes. Conventional cleaning products merely bleach the uric acid build but do not remove it. This causes blockages and the continual putrid odour that is often smelt around urinals. A number of the sanitising products kill some of the surface bacteria on the urinal and mask the odour for a period. The Bio Multi Kleen bacteria "eat away" the uric acid build up and permanently getting rid of the odours.

Above picture trials conducted over 14 days proving the astonishing organic degradation and odour removal capabilities of Bio Multi Kleen in a putrid urinal trap.

Recommended Application Rates

Tough stains, very hard to clean, neglected surfaces	Undiluted. **
Heavy Duty Cleaning	1:10
Regular cleaning, washrooms:	1: 20
Light cleaning, floors	1: 50

Bio Multi Kleen is formulated as an instant cleaner. For extremely hard to clean and neglected surfaces allow product to first stand on surface for 5 minutes first before cleaning.

NB! Do not use any other chemicals with Bio Multi Kleen. Chemicals kill our good bacteria and beneficial colony build up and will reduce the efficacy of the product.
