SOUTH AFRICAN cleaning products

why we're number one

- 1st to get EU Ecolabel accreditation for cleaning chemicals in the UK
- largest EU Ecolabel accredited range
- exclusively manufacture in South Africa
- manufacture green chemicals only
- award winning product range
- products are more powerful and safer than other known brands

suitable for

- catering
- housekeeping
- washrooms
- industry

performance

- going 'green' doesn't sacrifice performance. We achieve a 92% success rate compared to five non eco market leading brands

packaging

- it's 100% recyclable plastic, with eco friendly labels and glue. Reusable trigger bottles save money and plastic going to landfill

financial savings

- we offer a premium product that doesn't come at a premium. In most cases we reduce costs by supplying less products, not more

environmental

- exclusively use plant based, sustainable and biodegradable ingredients
- reduced impact on aquatic life
- reduced use of hazardous substances
- phosphate and phosphonate free

SOUTH AFRICAN cleaning products

innovation...it's what we do

- working in partnership with our clients we are a solution provider, continually looking for better and quicker ways of cleaning
- our award winning, innovative approach has made us the chemical product of choice for many associations

quick win

- our EU Ecolabel accredited range helps companies tick a very important box in meeting their environmental goals and policies

carbon footprint

- we ship as much as possible in concentrate form to reduce transport and carbon miles

cost effective

- our concentrate chemicals dilute down significantly meaning that just a small amount can go a long, long way....for example:

1x  = 166x 

farm to fork

- protecting the cycle: our cleaning chemicals have minimal effect on the environment; thus reducing the risk to water and soil for the growing of crops and the rearing of animals destined for human consumption

“

Delphis Eco reduced our range from over 40 products to less than 20, reduced costs by nearly 40% and replaced every toxic chemical with a green alternative. MD, Caterspan, Google
